

Anika Binta Azad Shifa

UI/UX DESIGNER | FRONTEND DEVELOPER

Dhaka, Bangladesh | +8801721136020 | anikabintaazad24@gmail.com
Github | <https://www.linkedin.com/in/anika-binta-azad-shifa/> | Portfolio

Professional Summary

UI/UX Designer with a strong frontend foundation, focused on user-centered, visually consistent digital experiences. Skilled in user research, wireframing, interaction design, responsive UI, design systems, and Figma prototyping, with hands-on knowledge of React, JavaScript, HTML, CSS, Bootstrap, and Tailwind CSS.

Education

Bachelor of Science in Computer Science & Engineering
University of Scholars, Banani, Dhaka

Present

UI/UX Skills

UX Research	User Research, Competitor Analysis, User Needs, Personas, Information Architecture
UX Design	User Flows, Interaction Design, Wireframing, Responsive Design, Usability, Task-Oriented Interfaces
UI Design	Visual Hierarchy, Layout, Typography, Color, Components, Design Systems, Responsive Interfaces
Prototyping	Low-Fi Wireframes, High-Fi UI, Interactive Prototypes, Design Iteration
Tools	Figma, FigJam, Canva, AI-Assisted Design, Prompt Engineering

Technical Skills

Frontend	HTML5, CSS3, JavaScript, React, Bootstrap, Tailwind CSS, Responsive Web Development
Programming & Tools	Python, C, C++, Git

Design Process

Research → Personas → User Flows → Wireframes → UI Design → Prototype → Testing

Experience

UI/UX Designer <i>FlyRank AI</i>	Jul 2026 – Present <i>Remote Internship</i>
--	--

- Leverage modern AI tools to accelerate design and development workflows within an AI-driven engineering environment.
- Build practical technical and product skills through a self-paced, AI-driven curriculum.
- Contribute to a portfolio-ready capstone project demonstrating technical proficiency and problem-solving.

Frontend Developer <i>Itransition</i>	Jul 2025 – Sep 2025 <i>Remote Internship</i>
---	---

- Engineered responsive user interfaces using HTML, CSS, and JavaScript.
- Integrated frontend components with backend APIs, streamlining CRUD-based application workflows.
- Contributed to collaborative presentation tools and game-logic applications, prioritizing functional, responsive interfaces.

UI/UX Projects

Whatcha Got? – Smart Meal Planning App	<i>Mobile App Design / Figma</i>
---	----------------------------------

- Crafted a mobile-first meal planning experience helping users decide what to cook based on available ingredients, mood, time, and budget.
- Mapped user flows and wireframes, then delivered high-fidelity screens and interactive prototypes for pantry-based recipe discovery and grocery-list workflows.
- Established a reusable component library, keeping visual hierarchy, spacing, and typography consistent across every screens.

Roséva – Transparency-First Skincare E-Commerce	<i>Website Design / Figma</i>
--	-------------------------------

- Conducted competitor analysis and research with users to surface trust-related concerns in skincare shopping.
- Translated findings into responsive web interfaces and high-fidelity interactive prototypes.
- Architected a complete design system — typography, color palette, and reusable components.
- Prioritized trust-centered shopping through ingredient transparency, verification, and clear information architecture.

Orbit Time Tracking Dashboard

Landing Page / Figma

- Produced a modern SaaS landing page and dashboard for time-tracking and productivity workflows.
- Structured visual hierarchy using cards, charts, and dashboard layouts across information-dense screens.
- Assembled responsive desktop interfaces from reusable components, emphasizing accessibility and clarity.

Sketchify – E-Commerce Platform

UI/UX + Frontend Development

- Delivered a responsive e-commerce platform spanning shopping, checkout, and dashboard experiences.
- Converted interface designs into frontend components using Flask, Bootstrap, JavaScript, and MongoDB.
- Secured authentication and payment flows using Bcrypt, Stripe, and SSLCommerz, supporting transactions in testing.
- Produced user and admin dashboards for profile management, order tracking, and automated invoicing.

Additional Projects

Secure User Management & Authentication System

React / Node.js / Express.js / JWT

- Built a full-stack authentication system with end-to-end user registration and login.
- Implemented JWT-based session handling with protected routing via React Context API and custom middleware.
- Developed protected frontend routing using React Context API and custom backend middleware to restrict dashboard access.

Bookstore Data Generator

Full-Stack Web Application

- Built a PWA (Workbox service workers) for generating, browsing, and exporting mock datasets in 3 languages, with CSV export.
- Implemented PWA functionality using Workbox service workers and added multilingual support for English, German, and Japanese.

Non-Transitive Dice Game

JavaScript / Cryptography / CLI

- Built a CLI logic engine computing win probabilities and detecting non-transitive cycles, using SHA3-256 HMAC for provable fairness.
- Used Pandas, NumPy, Matplotlib, and Seaborn for data processing and analysis, with SHA3-256 HMAC for provable fairness in random events.

Frontend & Design-to-Code Strength

Translates Figma designs into responsive interfaces using HTML, CSS, JavaScript, and React — with close attention to layout, reusable components, interaction states, and technical feasibility.

Certifications & Achievements

- Echologyx – Special Recognition, Designathon 2026
- Micro1 – Software Developer
- Microsoft Learn – AI for Beginners
- Anthropic – AI Fluency, Claude, Claude Code, Claude API, Claude Platform, Claude Cowork, AI Capabilities and Limitations, Model Context Protocol, Agent Skills, Subagents, Amazon Bedrock, Google Cloud's Vertex AI
- IUPC (Intra University Programming Contest) – Champion, Senior Division
- Robofest 1.0 – Champion, Drone Competition

Additional

Languages: Bangla (Native), English (Professional Working Proficiency)

Office: Microsoft Word, PowerPoint, Excel, Google Workspace

Typing: 40+ WPM
